KALYAN BHUKYA

HEALTH INFORMATICS ANALYST | DATA & FINANCIAL ANALYST

Email: kalyanb1917@gmail.com | Phone: +1 9728770715 | LinkedIn: linkedin.com/in/kalyan-nayak-bhukya-8897b8250

SUMMARY

- Health Informatics Analyst with **5+ years of experience** delivering **financial modeling, predictive analytics,** and **population health reporting** across Medicare, Medicaid, ACA Commercial, and claims-based datasets.
- **Advanced SQL proficiency** (CTEs, window functions, stored procedures, query optimization) and **Python (Pandas, NumPy, Scikit-learn)** for statistical analysis, anomaly detection, and automated healthcare data workflows.
- Proven expertise in **health informatics data modeling**, including **Star/Snowflake schemas, Source-to-Target Mapping (STM),** and dimensional modeling to support CMS reporting, audit readiness, and data governance.
- Skilled in developing **financial models and predictive analytics** for healthcare contracting, negotiations, population health management, and strategic enterprise initiatives using **SAS, SQL, Excel, Power BI,** and **Tableau.**
- **Experienced project lead** on cross-functional analytics projects; coordinates project workflow, manages timelines, stakeholder communications, and quality of deliverables across internal and external teams including **health plans, providers,** and **leadership.**
- Strong background in **data anomaly detection, benchmarking key financial and quality indicators,** and interpreting **claims data, encounter data,** and financial reports to explain findings to senior staff and project leads.
- Proficient in **Excel (Pivot Tables, VLOOKUP, Macros)** and statistical/regression-based analytics to develop **proposals, reports, spreadsheets, and presentations** supporting forecasting, performance benchmarking, and executive decision-making.

TECHNICAL SKILLS

Analytics & Modeling: SAS, SQL (CTEs, Window Functions, Optimization), Python (Pandas, NumPy, Scikit-learn), Statistical Analysis, Predictive Modeling, Financial Modeling, Population Health Analytics, Regression Analysis

BI & Reporting: Power BI, Tableau, IBM Cognos, SSRS, DAX, Power Query, KPI Reporting, Executive Dashboards, Data Storytelling

Databases: SQL Server, Oracle, DB2, PostgreSQL, MySQL, MongoDB

Cloud Platforms: Azure Synapse, Azure SQL DW, Databricks | AWS S3, Redshift, Glue, Lambda

ETL & Data Integration: Informatica IICS, SSIS, Spark, Data Pipelines, Source-to-Target Mapping, Data Validation, Databricks

Healthcare Domain: Medicare, Medicaid, ACA Commercial, Claims Data, Encounter Data, Risk Adjustment, CMS Reporting, HIPAA Compliance, Population Health Management

Data Modeling: Star Schema, Snowflake Schema, Fact & Dimension Tables, Dimensional Modeling, Data Governance, Metadata Management

Tools & Process: MS Office Suite (Excel Pivot Tables, Macros, VLOOKUP), Git, JIRA, Agile/Scrum, CI/CD Pipelines, GitHub, Jenkins, Docker

PROFESSIONAL EXPERIENCE

Client: Ascension Healthcare | Austin, USA | ***Health Informatics / Data Analyst*** Oct 2024 – Present

- Partnered with clinical, finance, and operational stakeholders to gather **healthcare claims and population health reporting requirements**, translating them into **Power BI dashboards** with DAX measures, drilldowns, and KPI slicers to monitor **Medicare and Medicaid** performance, improving executive reporting accuracy by **40%.**
- Developed and validated **predictive analytics and financial models** using **SQL, Python (Pandas, NumPy, Scikit-learn),** and **SAS** on claims and encounter datasets to benchmark key **financial and quality indicators** for population health management and strategic enterprise initiatives.
- Proactively identified **data anomalies and exceptions** in summarized healthcare data using **SQL (CTEs, window functions, aggregations)** across **Oracle, DB2, SQL Server,** and **AWS Redshift**, improving reporting performance by **30%** and enabling accurate benchmarking for CMS reporting.
- Leveraged **Databricks Delta Lake** and automated data quality validation to reconcile **500K+ healthcare claims and patient records,** ensuring **HIPAA-compliant data handling** and improving **clinical dashboard accuracy by 40%** across Medicare and Medicaid lines of business.
- Designed and maintained **Star and Snowflake dimensional data models** using **SQL Server, Oracle,** and **AWS Redshift,** enabling scalable **population health reporting,** consistent risk adjustment KPI definitions, and CMS audit readiness.
- Created detailed **Source-to-Target Mapping (STM)** and transformation documentation using **MS Office and data governance tools,** supporting data lineage, **CMS reporting requirements,** and healthcare governance compliance — serving as **project lead** on department data maintenance workflows across multiple concurrent deliverables.

Client: Accenture | PNC Bank | Bangalore, India | ***Data Analyst / Financial Analyst*** Apr 2021 – Jan 2023

- Independently developed and validated **financial models and predictive analytics** using **SQL, Python (Pandas, NumPy),** and **Excel (Pivot Tables, VLOOKUP, Macros)** on enterprise financial datasets, identifying **anomalies and benchmarking key financial indicators** to support forecasting accuracy and senior leadership decision-making.

- Gathered and documented **business requirements** in coordination with internal and external stakeholders, defining **data scope, analysis objectives,** and reporting deliverables — improving **standardized analytics workflows by 25%** across enterprise financial reporting teams.
- Designed and developed **SSIS ETL pipelines** to integrate multi-source financial and transactional datasets into enterprise data warehouses, improving **data availability for reporting teams by 35%** and supporting downstream reconciliation and audit workflows.
- Built interactive **Tableau dashboards** using filters, parameters, and calculated fields to analyze **revenue trends and operational KPIs,** delivering proposals, reports, and presentations to enable finance leadership to track performance and execute **data-driven strategy.**
- Served as **project coordinator** on mid-sized analytics projects, organizing project workflows, managing quality and timeliness of deliverables, and providing **written and verbal status communications** to team members and management — reducing **manual reporting effort by 30%.**
- Supported **data migration and reconciliation** using **SQL and ETL tools,** ensuring data consistency across environments and enabling smooth production deployment for **enterprise analytics platforms.**

Client: Capgemini | Mastercard | Hyderabad, India | ***BI Developer / Financial Analyst*** Jun 2019 – Mar 2021

- Designed and developed interactive **Tableau and Power BI dashboards** for transaction revenue, payment volumes, chargeback trends, and **executive KPI reporting** at Mastercard, improving leadership visibility into financial performance and reducing **monthly reporting turnaround time by 35%.**
- Developed optimized **SQL queries, datasets, and reporting tables** for fee revenue analysis, merchant performance tracking, and customer transaction insights, improving **dashboard performance by 30%** and enabling faster business reporting across finance teams.
- Built **predictive forecasting models** using historical transaction data to project payment volumes, seasonal demand, and revenue trends using **Python and Excel,** improving **forecast accuracy by 18%** for finance planning teams.
- Automated recurring **reconciliation, settlement, and financial reporting processes** using **Python and Microsoft Excel (Pivot Tables, VLOOKUP, Macros),** reducing **manual effort by 25%** and increasing reporting accuracy across stakeholder teams.
- Performed **ad-hoc analysis and anomaly detection** on transaction trends, customer spending behavior, and payment channel performance to identify revenue opportunities, contributing to a **12% improvement in operational efficiency.**
- Collaborated with finance, operations, and product stakeholders in an **Agile/Scrum** environment through requirements gathering, testing, and deployment, ensuring **95%+ on-time delivery** of analytics and reporting solutions.

CERTIFICATIONS

Google Data Analytics Professional Certification – Hands-on experience in SQL, Python, Power BI, Excel (Pivot Tables, VLOOKUP)

Microsoft Power BI Data Analyst Associate (PL-300) – In Progress

EDUCATION

Master of Science in Information Technology – Indiana Wesleyan University, USA | **Mar 2023 – Oct 2024**

Coursework: SQL, Python, Data Analytics, Database Management Systems (DBMS), Statistical Analysis, Programming for Data Analysis, Data Visualization, Software Development Life Cycle (SDLC)
